

Boma Chairs

The Boma chairs are all terrain wheelchairs that can be booked out by groups free of charge. They have a twist grip throttle and a squeeze break so hand control is needed, but they can also be used with a personal assistant controlling the throttle if hand control is a problem. They do not provide upper body support, but we do have two chest harnesses if needed. The seat does have some fine adjustment, and lots of the parts can easily be removed to allow easy access to the seat. These chairs allow users to freely access our entire site; the battery life is about a day so they need to be returned at the end of every day so that they can be re-charged.

We have 3 Boma chairs at the moment that are available for use, a hire form will need to be completed when hiring the Boma, so if the Boma's are damaged the costs can be recovered from the individual.
