New Forest Inclusive Cycling

Tandem tricycles – Draisin Duo and Cheetah side-by-side

Ideal options for children or adults with a visual impairment

- **Rear-steer tandem tricycle**
  - Reversed configuration
    - The pilot (driver) has the controls (steering, gears and braking) and sits at the back of the tandem
    - The stoker (passenger) sits at the front to experience the thrill of cycling and enjoy the stunning views of the New Forest.
  - Easy communication
    - This configuration means that communication with the passenger is much easier as the pilot can see them.
  - Passenger can develop their pedalling technique and grow in confidence
  - Secure stoker seat
    - The passenger has a wide, supportive back-rest and can be strapped into the seat. (Ideal for riders with less core-strength)

- **Cheetah side-by-side**
  - Semi-reclined position
    - Can make cycling much easier for those with joint pain (in legs or wrists) or those who are overweight.
    - Low-slung frame - easier to get on/off for those with limited mobility
  - Sociable riding
    - Both riders sit side-by-side meaning communication is easy
    - Passenger pedalling is optional – opportunity for progression

- **Wide wheelbase** –
  - Stable when stationary or moving.
  - Ideal for riders with poor balance

- **Strong and reliable**
  - Strong wheels and mountain biking tyres - ideal for New Forest cycle tracks.

- **Adjustable seats**
  - Seats can be adjusted to ensure a comfortable fit for both riders

On the Inclusive cycling fleet:

- **1 x Draisin Duo**
  - Pilot seat suitable for 10+ years
  - Stoker seat suitable for 6+ years

- **1 x Cheetah side-by-side**
  - suitable for 11+ years
