

Changes Made to the BCQ Question Book and Google Maps

Notes on changes to Location:

New question at Same Location - new question is at the exact same location, requiring no change to the location grid reference.

New question at Adjacent Location – new question is within about 50m of previous question.

New question at a Nearby Location – new question is in the same village/locality with no change to location name.

New question at a New Location – new question is a different location, which has a different location name. The new location may be some distance (miles) from the old location.

If a checkpoint point is moved to a New Location, and you had previously visited it at the old location, you **DO NOT** need to revisit it at the new location.
